PROFESSIONAL SUMMARY

Frontend Team Lead with experience building scalable, high-performance web applications using React.js and Next.js. Specialized in enterprise CRM, ERP, and travel booking platforms with strong focus on UI architecture, SSR optimization, and complex API integrations. Led a team of 4 frontend developers, driving Agile/Scrum delivery, code quality, and mentorship. Proven track record of improving application performance, Core Web Vitals, and SEO through modern frontend practices.

PROFESSIONAL EXPERIENCE

Frontend Team Lead / Sr. Web Developer

Aseum Infotech Pvt Ltd | Ahmedabad, Gujarat | Jul 2023 – Present

- Led a team of 4 frontend developers — conducting code reviews, setting coding standards, and mentoring developers to consistently deliver production-ready features within sprint deadlines.
- Architected and built large-scale travel ERP, CRM, and OTA platforms handling complex booking, financial, and operational workflows using React.js and Next.js.
- Spearheaded migration of 6+ business platforms from React SPA to Next.js SSR, improving Core Web Vitals scores and reducing average page load time by 30–40%.
- Migrated legacy class-based React codebase to modern functional architecture with hooks, reducing bug count by ~35% and cutting new developer onboarding time significantly.
- Optimized SEO and Lighthouse performance scores across all platforms through strategic server-side rendering (SSR) and static generation (SSG) implementation.
- Designed and delivered 10+ complex enterprise modules: flight & hotel booking (real-time APIs, dynamic pricing, cancellations), wallet & financial systems (transactions, withdrawals, ledger tracking), and CRM lead pipelines (lead → inquiry → booking lifecycle).
- Integrated 3+ third-party travel APIs — Tripjack, Etrav, FlyCreative — enabling seamless real-time booking and data synchronization across platforms.
- Implemented role-based access control (RBAC), dynamic menus, and permission-driven UI for multi-tenant enterprise applications.
- Collaborated with designers in Figma to translate wireframes into pixel-perfect, accessible (a11y / WCAG-compliant) React components.
- Followed Agile/Scrum methodology: sprint planning, daily standups, retrospectives, and backlog refinement with cross-functional teams.

Junior Software Developer

Aspire Softserv Pvt Ltd | Ahmedabad, Gujarat | Jan 2023 – Jul 2023

- Developed and shipped 5+ full-stack features using React.js and Node.js for a middleware platform serving 500+ employee-employer workflow interactions daily.
- Built and documented 20+ RESTful APIs using Express.js covering authentication, role management, and core business logic, reducing frontend integration time by ~20%.
- Delivered frontend and backend modules within Agile sprint cycles, contributing to a 15% improvement in overall platform response time through query optimization and component-level caching.

Frontend Developer (Intern → Full-time)

Lectus Technologies | Ahmedabad, Gujarat | Mar 2022 – Nov 2022

- Built and delivered 12+ responsive, accessible UI components using React.js and Bootstrap, reducing design-to-code turnaround by ~25%.
- Contributed to 4 feature releases, applying cross-browser compatibility best practices that reduced reported UI bugs by ~30% post-launch.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Redux Toolkit, Node.js, Express.js

Styling: Tailwind CSS, Bootstrap

Build Tools & Testing: Vite, React Testing Library

Database & Version Control: MongoDB, Git, GitHub

Design & Collaboration: Figma, Visual Studio Code

Methodologies: Agile, Scrum, RBAC, SSR, SSG, SEO, Core Web Vitals, Accessibility (a11y), WCAG

Other: REST API Integration, GraphQL, CRM/ERP Systems, AI-assisted Development

KEY ACHIEVEMENTS

- Team Leadership: Led 4 frontend developers — established code review processes, component library standards, and mentorship programs that improved team delivery speed.
- Performance & SEO: Achieved 30–40% reduction in page load times and improved Core Web Vitals by migrating 6+ React SPAs to Next.js SSR/SSG.
- Code Quality: Reduced codebase bug count by ~35% by migrating class-based React architecture to modern functional hooks pattern.
- API Integrations: Integrated 3+ third-party travel booking APIs (Tripjack, Etrav, FlyCreative) and PAN/GST verification systems into production.
- Module Delivery: Designed and delivered 10+ complex enterprise modules covering booking, financial, and CRM workflows end-to-end.

EDUCATION

B.E. – Information Technology

L. E. College, Morbi | Morbi, Gujarat | Jun 2019 – May 2023

CGPA: 8.51 / 10
